## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention.

I. Species of claims 1-20, disclose: wherein in case image data of a scanned original document is converted into n-types of color data for a first color data to an n-th color data and the image data is printed onto a recording paper based on each, of the color data, when carrying out the multi-up printing process by scanning plural pages of the original documents, the image data of the multiple pages of the original documents are respectively converted into at least the first color data, and an operation for printing the image data onto the recording paper starts.

II. Species of claims 21-22 disclose: means for controlling to select and execute the multi-up printing process when a size of a recording paper, which is obtained based on a size of an original document and an output magnification, is less than half of a maximum recording paper size and a next page of the original document detected at a stage a first page of the original document is scanned, and a number of sets of sheets to be printed is two sets or more, and to select and execute a one-up printing process otherwise, wherein if an odd number of sheets are to be printed, the last sheet is executed on the one-up printing process.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, These species are not obvious variants of each other based on the current record.

Applicant required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, no claims are generic. There is an examination and search burden for these patentably

Art Unit: 2625

distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under U.S.C. 101 and/or 35 U.S.C. 112 first paragraph. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance,
